"We use SCP to manage the procurement and distribution of catering stock for 55 destinations and over 200 suppliers. SCP enabled us to drive down the stock holding from \$12.9 mil to \$8 mil within 15 months while minimizing stock outs."
- Herman Muller, Kintetsu World Express

"Support is a main factor in making a decision about a preferred software package, and we can say without any doubt that the support from JMS is tremendous. No matter the day or night they are always ready to assist."
- Global Freight Forwarder, South Africa

"JMS software has improved customer service from 79% to 85% and inventory turns from 9 to 19. VMI initiatives utilizing SCP resulted in increased sales. Working with a results-driven company with such quick turnaround allows us to implement new business practices while others are still thinking about it."
- Jim Seafort, Fortune 500

Why JMS?

Low Risk - We share the risk with our clients. In addition to posting a **trial copy** for download on our site, we provide **no-cost customized demos** using your data.

No hidden costs - SCP 4.0 requires no additional software, no additional hardware, no new databases to buy, no administrators to hire, and no special servers to configure.

Unmatched support - You won't find outsourced support at JMS, even with **clients in 15 countries**. Our support is highly personalized and we are available 365x7x24 by telephone and email. Ask any of our customers about their JMS experience.

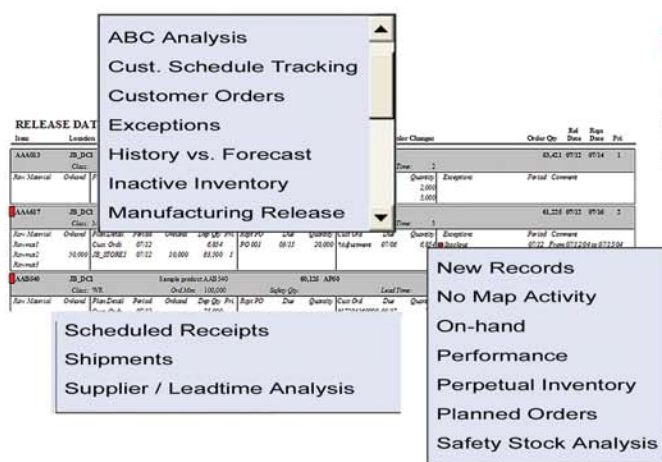

Why SCP 4.0?

ROI - SCP 4.0 costs fractions of competing products yet does much more. Unique features allow for quick installation resulting in low overall costs.

Smart & Functional - SCP is highly automated, user-friendly, and manage-by-exception driven. It includes our acclaimed **integration tool** to quickly establish 2-way communication with existing ERP solutions. Complex data? This flexible tool easily handles filtering, normalization, and manipulation of information with little effort.

Works with all electronic data sources
SQL Server, AS400 (DB2), ManMan, MfgPro, Progress, Oracle, SAP, ...any ODBC compliant database... Also Excel, ASCII, EDI, XML, FTP, Email... and many more.

Visibility - SCP doesn't just forecast and plan. It includes **powerful reporting and analytical tools**, and provides detailed visibility of all supply chain information in one place at the click of a button.

Jada Management Systems (JMS) was formed in 2001 by a group of logistics consultants with over 60 years of collective experience. We carefully designed SCP 4.0 from the ground up to offer organizations an intuitive, powerful, and affordable alternative to expensive, cumbersome supply chain programs.

JMS provides implementation, customization, training, and consulting services. We have a spotless record of helping companies improve planning and establish VMI relationships by providing powerful flexible tools that get the job done quickly and accurately.

Headquartered in the U.S. - West Linn, Oregon, JMS is a privately held company.
